## 1.2. URL to Cockpit

<https://s4dev.neptune-software.com/neptune/webapp/neptune/cockpit.html?sap-client=100>

## 1.3. Test Users

- SAP
  - TESTUSER1 / AppiumBS2022!!
  - TESTUSER2 / AppiumBS2022!!
- Azure
  - test.user.01@neptune-software.com / Impact22!
  - test.user.02@neptune-software.com / Impact22!
- OKTA
  - .User.01@neptune-software.com / Momo4615
  - Test.User.02@neptune-software.com / Ruhu7178

## 1.4. Creation of Artifacts

- Package assignment: We want to test also the abapgit integration for the artifacts that are being created in the tests. All artifacts (SAP and Neptune) should be put in personalized SAP Packages. There are the following packages:
  - YRT\_DXP23\_AC: André Carrilho
  - YRT\_DXP23\_LC : Luis Gonzalez
  - YRT\_DXP23\_XX:

Please assign to all artifacts the corresponding package. Also please try to have abapGit as part of your test and change flow. If you are changing something that you want to be tracked/versioned by git please go to abapgit, stage your change and push it to github. It makes sense to keep zabapgit opened in the background and hit regularly the “refresh” button and then apply your commits if needed.

- Cockpit: When you create new artifacts in the Cockpit please prefix them with the following pattern: RELEASETEST\_23\_....
- SAP: If you create new SAP Artifacts (Classes/Dataelements/Interfaces) please prefix them the following way:
  - Classes: YCL\_RT23\_
  - Interfaces: YIF\_RT23\_
- Other Artifacts something that makes sense after the Y
